
1. AfroGo's brand

Our brand pillars

- Township + commuter-hub focus
- Premium but accessible
- Fast, reliable, tech-driven
- Serious enough for B2B, friendly enough for B2C
- Slogan: **"WHERE YOUR PARCELS BELONG"**

What this logo communicates

- **Speed & movement** – the red swoosh flowing into the truck = fast, forward motion.
- **Logistics clarity** – truck icon makes it obvious you're in delivery / courier.
- **Professional & enterprise-ready** – dark navy wordmark, very clean sans serif, works on apps, dashboards, contracts, vehicles.
- **Tagline lock-up** – "WHERE YOUR PARCELS BELONG" sits neatly under the name as a secondary line, not overpowering.

2. AfroGo Brand Identity Kit (v1)

2.1 Core Elements

- **Brand Name:** AfroGo
- **Tagline:** **WHERE YOUR PARCELS BELONG**
- **Primary Logo:**
 - Word "AfroGo" in dark navy, bold sans serif.
 - Dynamic red swoosh flowing from left to right into a simplified navy delivery truck.
 - Tagline centred underneath in smaller caps.

3. Colour Palette

3.1 Primary Colours

To be used everywhere: logo, buttons, key highlights.

- **AfroGo Navy**
 - Hex: **#0B2745**
 - Use for: primary text, logo wordmark, truck icon, app header, navigation bars.
- **AfroGo Red**
 - Hex: **#E0272D**
 - Use for: swoosh, CTAs (primary buttons), highlights, important badges.
- **AfroGo White**
 - Hex: **#FFFFFF**
 - Use for: backgrounds, negative space, text on dark navy.

3.2 Neutral Support Colours

- **AfroGo Light Grey**
 - Hex: **#F4F6F9**
 - Use for: panels, cards, app backgrounds, table rows.
- **AfroGo Medium Grey**
 - Hex: **#9AA4B2**
 - Use for: secondary text, helper labels, borders.
- **AfroGo Dark Grey**
 - Hex: **#252F3E**
 - Use sparingly for: headings on light background, text over light grey, subtle icons.

Basic rules

- Keep **Navy + Red** as the heroes.
- Don't introduce random extra brand colours without a good reason (accent colours must complement these).

4. Typography System

Choose widely available, modern fonts that fit the logo.

4.1 Brand Fonts

- **Primary Display / Logo Companion:**
 - **Poppins Bold / SemiBold**
 - Use for: headlines, key numbers, big section titles.
- **Secondary Text / Body:**
 - **Poppins Regular / Medium**
 - or **Inter Regular** for long copy.
 - Use for: body text, UI labels, paragraphs, help text.
- **Code / Technical snippets (internal docs):**
 - **JetBrains Mono** or **Fira Code**.

4.2 Typographic Rules

- Headline example:
 - Size: 28–40px (web), 18–24pt (print), **Poppins SemiBold**, dark navy.
 - Body text example:
 - Size: 14–16px (web), 10–11pt (print), **Poppins/Inter Regular**, dark grey/grey.
 - Use **ALL CAPS** only for small UI elements (buttons, tags) or the tagline.
-

5. Logo Usage Guidelines

5.1 Primary Lock-Up

- **Horizontal:**
 - Icon (swoosh+truck) integrated over “AfroGo”.
 - Tagline under the wordmark: **WHERE YOUR PARCELS BELONG** (smaller, tracking slightly expanded).

This is your **default** for website header, pitch decks, letterheads, email signatures.

5.2 Secondary Variants

1. **Logo without tagline**
 - Use on very small surfaces (app bar, favicon, social avatar overlay).
2. **Icon only (truck + swoosh)**
 - Use for:
 - App icon
 - Social profile avatar
 - Favicon
 - Small stamps on packaging
3. **Stacked version** (for square formats)
 - Truck + swoosh above
 - “AfroGo” below
 - Tagline removed or centred second line if space allows.

5.3 Clear Space & Minimum Size

- Clear space around logo = at least the height of the “A” in AfroGo on all sides.
- Avoid placing other logos or text inside that area.
- For digital: keep the full logo (with tagline) **no smaller than ~220px wide**; below that, drop the tagline.

5.4 Incorrect Usage (Never Do)

- Don't change the colours (no green version, no rainbow, etc.).
 - Don't stretch or squish the logo.
 - Don't place it on busy backgrounds that hurt readability – if necessary, put it on a white or navy block.
 - Don't change the font of “AfroGo” or re-type the wordmark.
 - Don't move the swoosh or truck away from the wordmark arbitrarily.
-

6. Brand Applications

6.1 Mobile Apps & Web

- **App icon:**
 - White or navy square with **red swoosh + navy truck** simplified, no text.
- **Splash screens & header bar:**
 - Use full logo (without tagline on mobile) centred or left-aligned on a white or light grey background.

6.2 Packaging

- AfroGo-branded courier bags / boxes:
 - White base with navy logo and red swoosh.
 - Tagline printed on one side: **WHERE YOUR PARCELS BELONG.**
 - QR or link to track.afrogo.africa.

6.3 AfroGo Points

- Exterior signage:
 - White signboard or light background.
 - Full logo + “AfroGo Point”/“AfroCollect Pickup” in navy.
- Interior:
 - Counter mat or poster with logo + short line:
 - “Collect your AfroGo parcels here.”

6.4 Vehicles (Owner-Drivers)

- Magnets or stickers for driver cars/bakkies:
 - Icon + “AfroGo” wordmark, no tagline (readability at distance).
 - Use navy text and red swoosh on white background.

6.5 Documents & Presentations

- Pitch decks:
 - Use navy as background for covers, red for accent lines, white text for headings.

- Invoices, contracts, and letters:
 - White background, logo top left, navy headings, grey body text.
-

7. Tone of Voice (Verbal Identity)

- **Human, clear, confident** – no over-complicated courier jargon.
- **Locally rooted** – comfortable mixing English with local phrases sparingly in marketing, but keep operations and legal content clean English.
- **Reassuring & respectful** – people are trusting you with valuables and gifts.

Examples:

- “Your parcel has arrived at **Bara AfroGo Point. Collect any time between 09:00–18:00.**”
 - “From Sandton to Soweto, AfroGo makes sure your parcels belong exactly where they’re meant to be.”
-

8. Quick Brand Summary (for your files)

- **Logo:** AfroGo wordmark in dark navy with a red swoosh that flows into a navy delivery truck, tagline beneath: *WHERE YOUR PARCELS BELONG.*
 - **Colours:** AfroGo Navy (#0B2745), AfroGo Red (#E0272D), white, supporting greys.
 - **Fonts:** Poppins (headlines & UI) + Poppins/Inter (body).
 - **Style:** Clean, modern, logistics-focused, with a fast dynamic feel and inclusive South African flavour.
-

If you’d like, next I can:

- Write a **one-page Brand Guidelines PDF text** you can drop into Canva/Figma, or
- Help you define **social media templates** (post layout, story format, profile headers) using this logo and palette.
